

BLOOMBASTIC®

The "Bling Bling" for your plants

ATAMI®

NATURALLY INNOVATING

EXPENSIVE? GET THE FACTS!

Bloombastic seems expensive if you only look at the sticker price. It is highly concentrated, so you only need 0.5 - 1 ml of Bloombastic per liter feed water. This means that a single 325ml bottle will make over 650 liter of nutrient rich feed water. Bloombastic is a very affordable replacement for several supplements that you may currently be using and you'll achieve improved results.

"12 reasons to give Bloombastic a try"

01. All Bloom additives in one bottle: Booster, Accelerator, Hardener & Flower Enhancer.
02. Bloombastic is highly concentrated.
03. Bloombastic stretches the flower's cells, increasing their capacity to absorb potassium.
04. Bloombastic triggers sugar and bloom production.
05. It creates heavier, more compact blooms, compared to other products.
06. Essential oils are also increased.
07. Bloombastic stimulates the enzymatic processes on several levels, increasing your plant's resistance to stress factors such as: heat, dry air, high light intensity, disease and nutrient deficiencies.
08. Ensures a shorter flowering / ripening stage. Results are visible within 5 to 7 days.
09. Compatible with carbohydrates, provided their PK is not too high.
10. Bloombastic contains at least 50% more phosphorus and potassium than other bio-stimulants.
11. Organic based, containing sea kelp and clay minerals. Results in a healthy consumer product.
12. Bloombastic is suitable for all substrates and can be used in hydroponic, soil and coco applications.
